(hereinafter referred to as "IBASE").

Disclaimer

IBASE reserves the right to make changes and improvements to the products described in this document without prior notice. Every effort has been made to ensure the information in the document is correct; however, IBASE does not guarantee this document is error-free.

IBASE assumes no liability for incidental or consequential damages arising from misapplication or inability to use the product or the information contained herein, nor for any infringements of rights of third parties, which may result from its use.

Trademarks

All the trademarks, registrations and brands mentioned herein are used for identification purposes only and may be trademarks and/or registered trademarks of their respective owners.

Compliance

CE

This product has passed CE tests for environmental specifications and limits. This product is in accordance with the directives of the European Union (EU). In a domestic environment, this product may cause radio interference in which case users may be required to take adequate measures.

FC

This product has been tested and found to comply with the limits for a Class B device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with manufacturer's instructions, may cause harmful interference to radio communications.

WEEE

This product must not be disposed of as normal household waste, in accordance with the EU directive of for waste electrical and electronic equipment (WEEE - 2012/19/EU). Instead, it should be disposed of by returning it to a municipal recycling collection point. Check local regulations for disposal of electronic products.

Green IBASE

This product is compliant with the current RoHS restrictions and prohibits use of the following substances in concentrations exceeding 0.1% by weight (1000 ppm) except for cadmium, limited to 0.01% by weight (100 ppm).

- Lead (Pb)
- Mercury (Hg)
- Cadmium (Cd)
- Hexavalent chromium (Cr6+)
- Polybrominated biphenyls (PBB)
- Polybrominated diphenyl ether (PBDE)

Important Safety Information

Carefully read the precautions before using the board.

Environmental conditions:

- Use this product in environments with ambient temperatures between 0°C and 60°C.
- Do not leave this product in an environment where the storage temperature may be below -20° C or above 80° C.

Care for your IBASE products:

- Before cleaning the PCB, unplug all cables and remove the battery.
- Clean the PCB with a circuit board cleaner or degreaser, or use cotton swabs and alcohol.

Attention during use:

- Do not use this product near water.
- Do not spill water or any other liquids on this product.
- Do not place heavy objects on the top of this product.

Anti-static precautions

- Wear an anti-static wrist strap to avoid electrostatic discharge.
- Place the PCB on an anti-static kit or mat.
- Ground yourself by touching a grounded conductor or a grounded bit of metal frequently to discharge any static.

Danger of explosion if the internal lithium-ion battery is replaced by an incorrect type. Replace only with the same or equivalent type recommended by the manufacturer. Dispose of used batteries according to the manufacturer's instructions or recycle them at a local recycling facility or battery collection point.

Warranty Policy

IBASE standard products:

24-month (2-year) warranty from the date of shipment. If the date of shipment cannot be ascertained, the product serial numbers can be used to determine the approximate shipping date.

• 3rd-party parts:

12-month (1-year) warranty from delivery for the 3rd-party parts that are not manufactured by IBASE, such as CPU, CPU cooler, memory, storage devices, power adapter, panel and touchscreen.

* PRODUCTS, HOWEVER, THAT FAIL DUE TO MISUSE, ACCIDENT, IMPROPER INSTALLATION OR UNAUTHORIZED REPAIR SHALL BE TREATED AS OUT OF WARRANTY AND CUSTOMERS SHALL BE BILLED FOR REPAIR AND SHIPPING CHARGES.

Technical Support & Services

- 1. Visit the IBASE website at <u>www.ibase.com.tw</u> to find the latest information about the product.
- 2. If you need any further assistance from your distributor or sales representative, prepare the following information of your product and elaborate upon the problem.
 - Product model name
 - Product serial number
 - Detailed description of the problem
 - The error messages in text or in screenshots if there is any
 - The arrangement of the peripherals
 - Software in use (such as OS and application software, including the version numbers)
- 3. If repair service is required, you can download the RMA form at http://www.ibase.com.tw/english/Supports/RMAService/. Fill out the form and contact your distributor or sales representative.

Chapter 1 General Information

The information provided in this chapter includes:

- Features
- Packing List
- Optional Accessories
- Specifications
- Block Diagram
- Board Layout
- Board Dimensions

1.1 Introduction

ET976 is a COM Express Type-6 module supporting AMD V1000 series APUs with AMD V1000 series built-in Radeon Vega graphics for two independent displays with interface on the carrier board. It supports DDR4-2666 memory for QC APUs and DDR4-2400 for DC APUs.

Standard features supported with interface on the carrier board include an Intel® I210IT Gigabit controller, 4x USB 3.1 ports, 8x USB2.0 ports, and 2x SATA 3.0 ports. ET976 measures 125mm x 95mm and supports the Windows 10 (64bit) OS, with an operating temperature range of 0°C to 60°C.

ET976

1.2 Features

- AMD Ryzen[™] Embedded V1000 APU
- 4GB or 8GB DDR4 memory on board
- 2 x DDI + 1x eDP or 2x DDI + 1x LVDS
- 1 x Intel[®] PCIe GbE LAN, 8x USB 2.0, 4x USB 3.1, 2x SATA III
- 1x PCle (x8), 7x PCle (x1)
- Configurable watchdog timer, TPM 2.0, Digital I/O

1.3 Packing List

Your ET976 package should include the items listed below. If any of the items below is missing, contact the distributor or dealer from whom you purchased the product.

•	ET976 COM Express Module	x 1
•	Disk (including drivers and flash memory utility)	x 1
•	This User's Manual	x 1

1.4 Specifications

	• ET976-1807-4G
	• ET976-1807LV-8G
Product name	• ET976-1605LV-4G
	• ET976-1202-4G
	• ET976-1202LV-E4G
	System
Operating system	Windows 10 (64-bit)
	- BGA-1140 package (35 x 32 x 1.38mm), 14nm, Zen cores
	- AMD V1807B: /QC/3.35GHz~3.8GHz/2MB L2 cache /35W~54W TDP
APU	- AMD V1605B: /QC/3.0GHz~3.6GHz/2MB L2 cache/12W~25W TDP
	- AMD V1202B: /DC/2.3GHz~3.3GHz/1MB L2 cache/12W~25W TDP
	AMD V1000 APU integrated memory controller
	Onboard memory DDR4-2666 (1.2V), Max. 8GB, ECC compatible
Memory	-DDR4 4G (512MX16) FBGA
	-DDR4 8G (1GX16) TFBGA
	DDR4-2666 for QC#, DDR4-2400 DC
Graphics	AMD V1000 series APU built-in Radeon Vega graphics, Supports
Graphics	2x independent displays via carrier board for 2x DDI
	24-bit dual channel via NXP PTN3460 for eDP to LVDS
2700	P/N: PTN3460 or eDP
LAN	1x Intel® I210IT GbE, co-lay Intel I211AT via carrier board
	AMD V1000 APU built-in USB controller, Max. ports support:
USB	4x USB3.1 ports (COMe supports USB3.1 Gen1)
036	8x USB2.0 ports [USB 2.0 Hub x4 ports (Thru Renesas PD720115) via carrier board

	-1 x PEG(x8) (Gen3.0)
Expansion	 -7 x PCIe(x1) (Gen2.0) (4xPCIe(1x)(Gen3)thru GPP, 4x PCIe(1x) from PCIe switch (PERICOM PI7C9X2G606PR) 2x PCIe(1x)for A/B connector and 1x PCIe(1x) for C/D connector)
Serial ATA	2x SATA 3.0 (6Gb/sec.) ports via carrier board
LPC I/O	Fintek F81804U-I for 2x COM port x2 (TX/RX), -GPIO, Brightness control
Digital IO	4 in & 4 out
Audio	AMD V1000 series APU built-in HD interface
Watchdog	Yes (256 segments, 0, 1, 2255. sec/min)
Connector	Two 220-pin connectors (A-B & C-D)
to carrier board	[COM Express 3.0 standard]
Power	+12V, +5VSB, 8.5V~ 20V (DC-IN)
TPM 2.0	Infineon SLB9670VQ2
Certification	CE (EN55032:2012), FCC Class B
OS support	Windows 10 (64bit)
Board size	125mm x 95mm
RoHS	Yes
Operating temperature	0°C~60°C
Storage temperature	-20°C~80°C

All specifications are subject to change without prior notice.

Chapter 2 Hardware Configuration

The ET976 is connected to the COM Express carrier board via two 220-pin connectors based on the COM Express 3.0 standard. Each connector contains two rows of signals (A-B & C-D). This section provides pinout definitions of the ET976 COM Express connectors.

2.1 ET976 COM Express Connectors

COM Express Module Type 6 Connector (COM_E_AB1, COM_E_CD1)

Chapter 3 Drivers Installation

This chapter introduces installation of the following drivers:

- AMD Ryzen[™] V1000 Graphics Drivers
- Realtek HD Audio Driver Installation
- LAN Driver Installation
- Observer Setup Wizard

3.1 Introduction

This section describes the installation procedures for software and drivers. The software and drivers are included with your product. If you find anything missing, please contact the distributor where you made the purchase. The contents of this section include the following:

3.2 AMD Ryzen[™] V1000 Graphics Drivers

1. Insert the disk enclosed in the package with the board. Click **AMD** on the left pane and then **AMD Ryzen V1000 Drivers**.

2. Click AMD Ryzen V1000 Graphics Drivers.

3. Read the software license agreement and click **Accept and Install** to proceed.

4. Choose and click on either Express Install or Custom Install.

- 5. Proceed to install the graphics driver.
- 6. Restart the computer when prompted for changes to take effect.

3.3 Realtek HD Audio Driver Installation

- 1. Click AMD on the left pane and then AMD Ryzen V1000 Drivers.
- 2. Click Realtek High Definition Audio Driver.

3. On the *Welcome* screen of the InstallShield Wizard, click **Next** to continue with the installation.

4. When installation is complete, restart the computer when prompted.

3.4 LAN Driver Installation

1. Click LAN Card on the left pane and then Intel LAN Controller Drivers.

2. Click Intel(R) I21x Gigabit Networks Drivers.

- 3. When the Welcome screen to the install wizard appears, click Next.
- 4. On the following screen, accept the license agreement and click Next.
- On the Setup Options screen, tick the checkbox to select the desired driver(s) for installation. Then click Next to continue.
- 6. On the next screen, click **Install** to begin the installation.
- 7. Once "Install wizard is Completed," click Finish.

3.5 Observer Setup Wizard

1. Click **Tools** on the left pane and then **Observer**.

 On the Welcome screen, click Next to install Observer on your system. It is recommended that you close all other applications before continuing.

3

3. The following screen shows the installation destination locatoin or folder. To continue, click **Next**. If you would like to select a different folder, click **Browse**.

ß	Setup - Observer6 32bit/64bit	-		×
	Select Destination Location Where should Observer6 32bit/64bit be installed?			
	Setup will install Observer6 32bit/64bit into the following fo	lder.		
	To continue, dick Next. If you would like to select a different folder,	click Bro	owse.	
	C:\Users\et976\AppData\Local\Observer6	Br	rowse	
	At least 26.6 MB of free disk space is required.			
	< Back Nex	t >	Ca	ncel

- 4. In the **Ready to Install** screen, click **Install** to continue with the installation.
- 5. On the following screen, you will be prompted to restart your computer to complete the installation. Click **Finish**.

This page is intentionally left blank.

Chapter 4 BIOS Setup

This chapter describes the different settings available in the AMI BIOS that comes with the board. The topics covered in this chapter are as follows:

- Main Settings
- Advanced Settings
- Chipset Settings
- Security Settings
- Boot Settings
- Save & Exit

4.1 Introduction

The BIOS (Basic Input/Output System) installed in the ROM of your computer system supports Intel[®] processors. The BIOS provides critical low-level support for standard devices such as disk drives, serial ports and parallel ports. It also provides password protection as well as special support for detailed fine-tuning of the chipset controlling the entire system.

4.2 BIOS Setup

The BIOS provides a Setup utility program for specifying the system configurations and settings. The BIOS ROM of the system stores the Setup utility. When you turn on the computer, the BIOS is immediately activated. Press the key immediately allows you to enter the Setup utility. If you are a little bit late pressing the key, POST (Power On Self Test) will continue with its test routines, thus preventing you from invoking the Setup.

If you still need to enter Setup, restart the system by pressing the "Reset" button or simultaneously pressing the <Ctrl>, <Alt> and <Delete> keys. You can also restart by turning the system Off and back On again.

The following message will appear on the screen:

Press to Enter Setup

In general, press the arrow keys to highlight items, <Enter> to select, the <PgUp> and <PgDn> keys to change entries, <F1> for help, and <Esc> to quit.

When you enter the BIOS Setup utility, the *Main Menu* screen will appear on the screen. The Main Menu allows you to select from various setup functions and exit choices.

Warning: It is strongly recommended that you avoid making any changes to the chipset defaults.

These defaults have been carefully chosen by both AMI and your system manufacturer to provide the absolute maximum performance and reliability. Changing the defaults could make the system unstable and crash in some cases.

Save Changes	Save changes done so far to any of the setup options.
Discard Changes	Discard changes done so far to any of the setup options.
Restore Defaults	Restore / Loads defaults values for all the setup options.
Save as User Defaults	Save the changes done so far as User Defaults.
Restore User Defaults	Restore the user defaults to all the setup options.

Appendix

This section provides the mapping addresses of peripheral devices and the sample code of watchdog timer configuration.

A. I/O Port Address Map

Each peripheral device in the system is assigned a set of I/O port addresses which also becomes the identity of the device. The following table lists the I/O port addresses used.

Address	Device Description
0x00000A00-0x00000A0F	Motherboard resources
0x00000A10-0x00000A1F	Motherboard resources
0x00000A20-0x00000A2F	Motherboard resources
0x00000378-0x0000037F	Printer Port (LPT1)

B. Interrupt Request Lines (IRQ)

Peripheral devices use interrupt request lines to notify CPU for the service required. The following table shows the IRQ used by the devices on board.

Level	Function
IRQ 0	System timer
IRQ 3	Communications Port (COM2)
IRQ 4	Communications Port (COM1)
IRQ 6	Communications Port (COM4)
IRQ 7	AMD GPIO Controller
IRQ 8	High precision event timer
IRQ 10	Communications Port (COM3)
IRQ 14	AMD I2C Controller
IRQ 53	High Definition Audio Controller AMD Audio CoProcessor
IRQ 54	AMD High Definition Audio Controller
IRQ 55	AMD SFH KMDF I2C
IRQ 56 ~ IRQ 511	Microsoft ACPI-Compliant System
IRQ 4294967278 ~ 4294967283	Intel(R) I210 Gigabit Network Connection
IRQ 4294967292	PCI Express Root Port
IRQ 4294967272~7	Intel(R) I211 Gigabit Network Connection
IRQ 4294967261~ 4294967268	AMD USB 3.10 eXtensible Host Controller - 1.10 (Microsoft)
IRQ 4294967291,3,4	PCI Express Root Port
IRQ 4294967286	Standard SATA AHCI Controller
IRQ 4294967287,88, IRQ 42949672890	PCI Express Downstream Switch Port
IRQ 4294967269~71	AMD Radeon(TM) Vega 8 Graphics
IRQ 4294967253~ 4294967260	AMD USB 3.10 eXtensible Host Controller - 1.10 (Microsoft)
IRQ 4294967288	PCI Express Downstream Switch Port
IRQ 4294967284~ 4294967285	AMD PSP 10.0 Device

C. Watchdog Timer Configuration

The Watchdog Timer (WDT) is used to generate a variety of output signals after a user programmable count. The WDT is suitable for use in the prevention of system lock-up, such as when software becomes trapped in a deadlock. Under these sorts of circumstances, the timer will count to zero and the selected outputs will be driven.

Under normal circumstance, you will need to restart the WDT at regular intervals before the timer counts to zero.

* F81804 DIO Main Function Example

```
INTN
EFIAPI
ShellAppMain (
 IN UINTN Argc,
 IN CHAR16 ** Argv
 )
{
 UINT8 DIO;
 F8104EnterConfig();
 if(!F81804Init()){ //Check if this SIO is F81804
  return 0;
 }
 F81804DioInit(); //Init F81804 DIO
 F81804SetOutput(0x00); //Set out0-3 to Low
 DIO = F81804GetInput();
 if(DIO != 0x00)
  return 0;
 }
 F81804SetOutput(0x1E); //Set out0-3 to High
 DIO = F81804GetInput();
 if(DIO != 0x0F){
  return 0;
 }
```
